Objective

Motivated MCA student with a strong foundation in software development and a passion for building AI-powered and full-stack solutions. Skilled in transforming ideas into practical applications, with hands-on experience in automation, web development, and voice-enabled assistants. Seeking opportunities to apply technical expertise, problem-solving ability, and creativity to contribute to innovative projects.

Education

Charusat University, Bachelor of Computer Application Aug 2021 – May 2024

- GPA: 8.34
- **Coursework:** Application Development, Web Development

Charusat University, Master of Computer Application Aug 2024 – May 2026

- **Coursework:** Application Development, Web Development, AI Integration

Experience

• **Intern | Haronex Techonology** November 2025 – Present
Full Stack Developer & HR Executive

- Developing backend systems using **Django** and **REST APIs** to handle company data.
- Working on both HR tasks and software development to make office work faster and more efficient.
- Helping the recruitment team by using my technical knowledge to interview and filter new developers.
- Working closely with the dev team to connect the website designs with the backend logic.
- Managing employee records and office coordination while writing code for internal software.

• **Intern | Kaviaya Technologies** July 2025 – November 2025
Working as Full Stack developer gaining hands-on experience in

- Designing user-friendly UI/UX interfaces with modern tools
- Developing software to improve efficiency
- Collaborating with developers to integrate design with backend systems

Projects

A Personal Voice Assistant

- Built a smart voice assistant for Windows with wake-word detection, natural voice interaction, and task automation.
- Supported both speech and text input for accessibility, enabling functionalities such as answering queries via GPT, playing music, opening applications, searching the web, and automating routine tasks.
- Tools Used: Python, OpenAI GPT, SpeechRecognition, Pytsx3

Automated Recruitment System

- Designed an AI-powered application to automate recruitment processes by analyzing resumes and matching candidates with company policies and requirements.
- Integrated AI-driven interview simulations and intelligent shortlisting, reducing manual screening effort and improving hiring efficiency.
- Tools Used: Python, Groq API, firebase

Automated Timetable Management System

- Developed a dynamic web application to automatically generate and optimize timetables for schools and colleges.
- Accounted for class schedules, faculty availability, and subject constraints to minimize conflicts and improve time management for students and teachers.

- Tools Used: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap

Idea-Innovator-Investor Platform

- Created a platform that connects startups with potential investors by allowing innovators to pitch their ideas through documents, presentations, and detailed project information.
- Streamlined communication with features such as investor notifications, document sharing, and secure email integration to support funding opportunities and collaborations.
- Tools Used: PHP, PHPMailer, MySQL, HTML, CSS, JavaScript, Bootstrap

Skills

- **Programming Languages:** C, C++ , Java, Python, JavaScript,php
- **Web & Full Stack:** HTML, CSS, Bootstrap, AngularJS, Node.js, Express.js
- **Database & Cloud:** MySQL,PL-SQL, MongoDB, Firebase, REST APIs
- **AI & Automation:** Generative AI (GPT), n8n Automation
- **Software & Tools:** GitHub, VS Code, Power BI
- **Design & Visualization:** Photoshop, Adobe XD, Figma, Canva
- **Soft Skills:** Leadership, Teamwork, Problem Solving, Adaptability, Communication,Time Management
